## DYNAMIC SEATING REQUIRED

At last, a chair that supports constant movement:  
the seat is connected to the base via pivot points that transfer the user's movements  
to the chair base. This effect strengthens the back and improves concentration.  
The chair is flexible in other ways, too – it can be stacked and linked,  
and is available in a variety of styles.

# MINIMALIST DESIGN WITH *MAXIMUM MOBILITY*

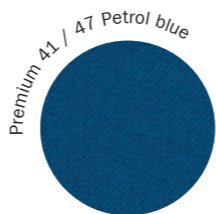

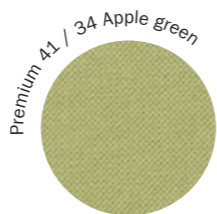

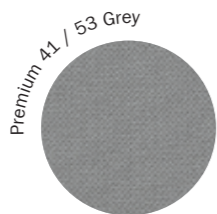

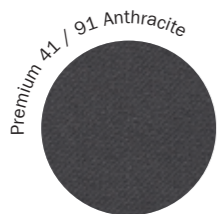

## PRACTICAL AND EASY TO INTEGRATE

configuration. And taking them down again to store is just as quick thanks to  
the folding mechanism. The MOVE.ME table – like the rest of the range – brings  
a new relaxed style to meeting and seminar rooms.

It's the little things that make MOVE.ME mobile

**1 | CONTEMPORARY**  
The folding table with its 25 mm top looks light and elegant. The frame is made from flexible steel wire, making folding easy.

**2 | FLEXIBLE**  
With the legs folded away, the tables are stacked in no time at all. The hinges are easy to open and close, making linking simple, too.

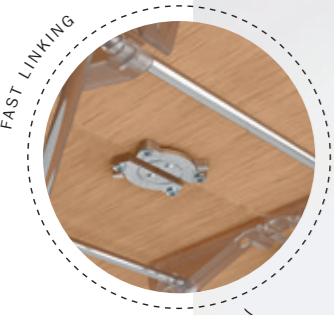

**3 | ELEGANT**  
The stackable low lectern with tilting top is available with or without a modesty panel.

**4 | FUNCTIONAL**  
The high lectern has a modern, fresh look and modesty panels at the sides, concealing the leg area from view.

**5 | ROBUST**  
The canteen tables are particularly stable yet with a light and modern look.

**6 | MOBILE**  
Not only does the screen look light, it's also light-weight, so rooms can be partitioned quickly, which also helps improve acoustic properties.

**7 | PRACTICAL**  
The caddy offers storage space for the speaker – or comes with special catering accessories.
